Emergency Response - LaSalle Intermediate and Secondary School

The Emergency Response Focus Program is geared towards those who are interested in a career in Nursing or the Emergency Medical System, be it Firefighting, Law Enforcement, or Paramedic. The program will also show you careers in areas you may not have considered such as Coast Guard and Corrections.

The course is great for post-secondary preparation as a St. Lawrence College Professor teaches a first year Anatomy and Physiology course as a dual credit, very beneficial for those intending to apply to St. Lawrence College in most programs.

We also have wonderful relationships with Kingston Police Force, Kingston Fire Department and St. Lawrence Pre-Service Firefighting program and an opportunity to be trained in first aid as an Emergency First Responder.

Suggested Prior Courses
- English
- Healthy Active Living
- Science
- Biology

Costs
Optional:
$430 - Required if pursuing Red Cross Emergency First Responder/CPR HCP (3 yr.) Certification.
